EDUCATION

Shah Abdul Latif University

Bachelor of Computer Science

Khairpur

Aug. 2018 – Sep 2022

EXPERIENCE

Laravel Developer Intern

NestedFor

Dec. 2024 – Jun 2025

Islamabad, PK (Remote)

- Integrated Shopify GraphQL APIs to read and manipulate dynamic store data across product catalogs and checkout modules.
- Maintained backend scripts for automated product data synchronization and warehouse inventory adjustments.
- Collaborated with senior engineers to scale and test external e-commerce API endpoints.

PHP Developer Intern

Sanskar Corporation

Aug 2023 – Mar 2024

Lucknow, IN (Remote)

- Developed responsive user interfaces for Laravel web applications using Tailwind CSS.
- Built server-side request validation rules and secure input handling for contact and user-lead forms.
- Handled catalog data manipulation by utilizing Laravel Eloquent ORM to build custom product sorting and category filtering logic.

PROJECTS

Tijarat | Livewire, Laravel, Alpine.js, Tailwind CSS, MySQL

May 2026 – Present

- Building a B2B inventory engine featuring an automated workflow for generating and tracking commercial business quotations.
- Utilizing Livewire to handle instant backend-to-frontend reactivity, eliminating manual page refreshes on heavy data tables.
- Designing relational database schemas to safely process multi-step transactions and protect financial back-office operations.

Connectify | Laravel, Tailwind CSS, JavaScript, MySQL

Mar 2024 – May 2026

- Engineered a decoupled social platform deployed containerized on Railway, isolating core domain logic inside Laravel Service Classes while offloading media assets to Cloudinary and queries to a distributed TiDB cloud database cluster.
- Optimized frontend client performance by building a custom vanilla JavaScript Event Bus alongside an Intersection Observer API implementation for infinite scrolling and debounced asynchronous search.
- Designed and indexed complex MySQL schemas to dynamically serve personalized user newsfeeds based on selected interest topics and proximity-based location filtering.

ShopEase | Native PHP, HTML5/CSS3, MySQL, Git

Feb 2023 – Oct 2023

- Programmed a functional e-commerce platform completely from scratch using native PHP and raw MySQL to master web development fundamentals.
- Built a custom, session-based shopping cart handling product inventory states, dynamic quantities, and checkout sequences.
- Implemented manual server-side routing and custom data validation rules to handle client requests securely.

TECHNICAL SKILLS

Languages: PHP, JavaScript (ES6+), SQL, HTML5, CSS3

Frameworks: Laravel, Livewire, Alpine.js, Tailwind CSS

Developer Tools: Git, GitHub, VS Code

Databases and APIs: MySQL, REST, GraphQL, Shopify API
